Portfolio

EDUCATION

- **Sikkim Manipal Institute of Technology** July 2019 - August 2023
Bachelor of Technology, Computer Science Engineering; CGPA: 8.8 Sikkim, India

EXPERIENCE

- **Osfin.ai** February 2025 - Present
Software Developer Bangalore, India
 - Built a React + TypeScript design system with 20+ components (OTP inputs, alerts, badges, menus, charts), design tokens, Storybook docs, and multi-tenant theming — adopted across the product to keep UI consistent.
 - Improved performance on pages with large transaction datasets (10,000+ rows) using list/table virtualization, infinite scroll, and server-side pagination, reducing render times by 60%.
 - Built dynamic form and validation flows using Formik and Yup, including schema-driven fields and financial data validations — used across 10+ configuration screens.
 - Built an in-app AI assistant (1st Runner-Up at internal hackathon) with real-time WebSocket streaming, markdown rendering, interrupt controls, and session management — reduced on-call engineer interruptions by 40% by helping implementation teams self-resolve config issues. Also added a global fuzzy search for quick cross-app navigation.
 - Implemented end-to-end voucher and multi-level approval flows covering manual actions, adjustments, and force match/unmatch, using RBAC to control which actions and routes each user role could access.
 - Mentored junior developers through code reviews and used Cursor to speed up repetitive tasks without cutting corners on quality.
- **IEMA Rsearch and Development Pvt. Ltd** January 2025 - February 2025
Web Development Intern Kolkata, India
 - Built an ETL solution using React and Flux, creating dynamic interfaces and ensuring seamless data flow between components to support reliable data processing.
 - Designed a responsive company service webpage in Figma, improving the overall user interface and branding, which resulted in a more modern look and better user engagement.
- **Keysight Technologies** January 2023 - July 2023
Research and Development Intern Kolkata, India
 - Integrated new features into React components, including advanced state management and conditional rendering, which reduced feature implementation time.
 - Manually debugged 50+ test cases, identifying and resolving critical software issues that significantly improved code quality and application performance.
- **Variable Energy Cyclotron Center** June 2022 - July 2022
Web Development Intern Kolkata, India
 - Revamped the recruitment page UI by modernizing the codebase and implementing Bootstrap for a fully responsive layout — reducing code-related issues by 30% and increasing user engagement by 40%.

SKILLS

- **Programming Languages:** HTML, CSS, JavaScript, Java, Python(Basic)
- **Framework / Libraries:** ReactJS, Redux, Tailwind, Bootstrap, Flask
- **Designing:** Adobe Illustrator, Adobe Photoshop, Figma
- **Tools and Technologies:** GIT, VS code, Firebase
